

# Data Sheet

| Customer:    |                       |
|--------------|-----------------------|
| Part No:     | CL-BIT3216USO-02      |
| Sample No:   |                       |
| Description: | 3216 SMD Orange Color |
| Item No:     |                       |

| Customer                       |  |  |  |  |  |
|--------------------------------|--|--|--|--|--|
| Check Inspection Approval Date |  |  |  |  |  |
|                                |  |  |  |  |  |

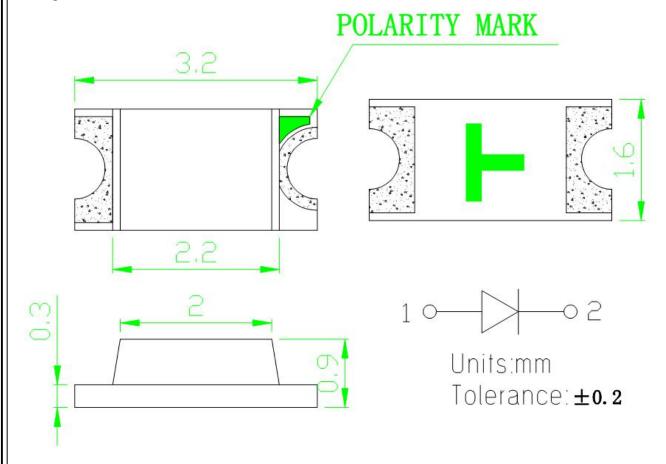

#### **Features**

- \_3.2mmX1.6mm SMT LED, 0.90mm THICKNESS.
- LOW POWER CONSUMPTION.
- \_WIDE VIEWING ANGLE.
- IDEAL FOR BACKLIGHT AND INDICATOR.
- VARIOUS COLORS AND LENS TYPES AVAILABLE.
- PACKAGE: 3000PCS / REEL.
- RoHS COMPLIANT.

## **Description**

The Super Bright Orange device is made with DH InGaAIP (on GaAs substrate) light emitting diode chip.

# **Package Dimensions**

#### Notes:

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is  $\pm 0.1 (0.004\mbox{"})$  unless otherwise noted.
- 3. Specifications are subject to change without notice.

### **Selection Guide**

| Down No.         | Diag                  | <b>.</b>    | lv (mcd) |      | Viewing               |
|------------------|-----------------------|-------------|----------|------|-----------------------|
| Part No.         | Dice                  | Lens Type   | @ 20mA   |      | Angle                 |
|                  |                       |             | Min.     | Тур. | <b>2</b> θ <b>1/2</b> |
| CL-BIT3216USO-02 | Orange<br>(GaAsP/GaP) | WATER CLEAR | 70       | 150  | 120                   |

### Note:

1.  $\theta$ 1/2 is the angle from optical centerline where the luminous intensity is 1/2 the optical centerline value.

## Electrical / Optical Characteristics at TA=25°C

| Symbol | Parameter                | Device | Min | Max. | Units | Test Conditions |
|--------|--------------------------|--------|-----|------|-------|-----------------|
| λD     | Dominant Wavelength      | Orange | 600 | 610  | nm    | IF=20mA         |
| Δλ1/2  | Spectral Line Half-width | Orange | 29  |      | nm    | IF=20mA         |
| С      | Capacitance              | Orange | 30  |      | pF    | VF=0V;f=1MHz    |
| VF     | Forward Voltage          | Orange | 1.8 | 2.3  | ٧     | IF=20mA         |
| IR     | Reverse Curren           | Orange |     | 2    | uA    | VR = 7V         |

#### Remarks:

If special sorting is required (e.g. binning based on forward voltage, luminous intensity, or wavelength), the typical accuracy of the sorting process is as follows:

1. Wavelength: +/-1nm

2. Luminous Intensity: +/-15%

3. Forward Voltage: +/-0.1V

Note: Accuracy may depend on the sorting parameters

#### Absolute Maximum Ratings at Ta=25°C

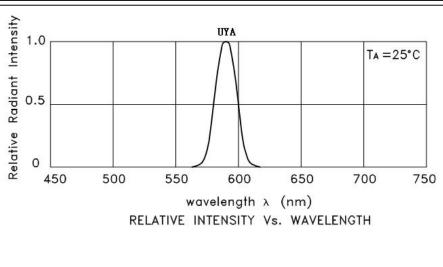

| nate maximam ratings at 14 20 0 |                |       |
|---------------------------------|----------------|-------|
| Parameter                       | Orange         | Units |
| Power dissipation               | 75             | mW    |
| DC Forward Current              | 30             | mA    |
| Peak Forward Current [1]        | 80             | mA    |
| Reverse Voltage                 | 5              | V     |
| Operating/Storage Temperature   | -40°C To +85°C | •     |

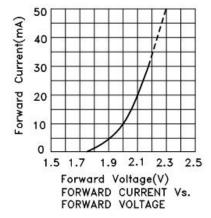

### Note:

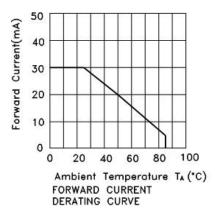

1. 1/10 Duty Cycle, 0.1ms Pulse Width.

The above test items such as differences or special customer specific requirements according to the actual situation in accordance with the requirements of customers to try the requirements with the customer, the customer is not required by our test standard test. Different products using different current test

# 5. Cautions

## (1) Soldering Conditions

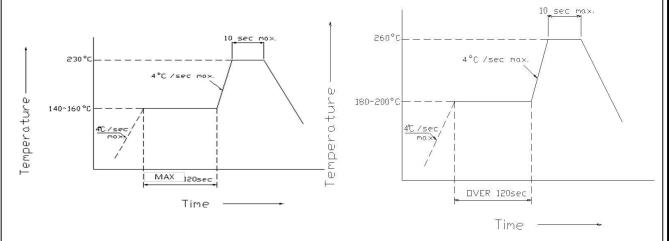

Number of reflow process shall be less than 2 times and cooling process to normal temperature is required between first and Second soldering process.

(Recommended soldering conditions)

|   | Reflow Solde   | Manual Soldering   |                          |                            |
|---|--|--|--------------------------|----------------------------|
| Pre-heat  | Lead<br>Solder   | Lead-free<br>Solder  | Temperature<br>Soldering | 350° C Max.<br>3 sec. Max. |
| Pre-heat time Peak temperature Soldering time Condition | 140 ~ 160° C<br>120 sec. Max.<br>230° C Max.<br>10 sec. Max. | 180 ~ 200° C<br>120 sec. Max.<br>240° C Max.<br>10 sec. Max. | time                     | (one time only)            |

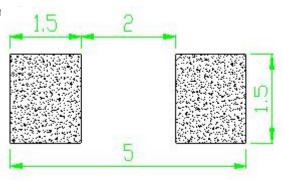

(Lead Solder)

## (Lead-Free Solder)

Recommended Solderii

(Units: mm)

### (2) Static Electricity

It is recommended that a wrist band or an anti-electrostatic glove be used when handling the LEDs.

All devices, equipment and machinery must be properly grounded.

Damaged LEDs will show some unusual characteristics such as the forward voltage becomes lower, or the LEDs do not light at the low current. Criteria: (VF > 2.0V at IF=0.5mA)

(3) Moisture Proof Package

It is recommended that moisture proof package be used.

### (4)Cautions:

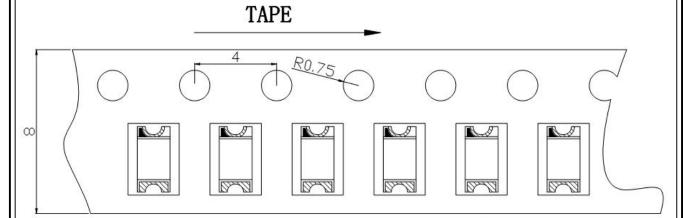

- 4.1.Please check if there is air leak before opening the package, if so, please return the goods back to take drying process for later using.
- 4.2 Products can be used within 15days after packaging, after that, they must be:
  - 4.2.1Soldered within 24 hrs
  - 4.2.2 Used in the condition: 30°C within and 60%RH below
  - 4.2.3 Stored in 30%RH for moisture below.
- 4.3. Products cannot be used for and over 15days after being packaged unless opening the package and take drying our process in 85°C/6H.
- 4.4Products not be used for or over 60days after being packaged please return back to take drying out and packaging process for forward using.
  - 4.5. Products not be used after opening the package need to be dried out for 85 °C/6H

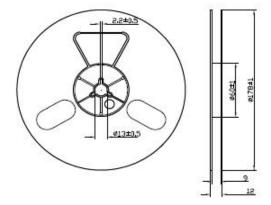

# **PACKAGING**

The LEDs are packed in cardboard boxes after taping.

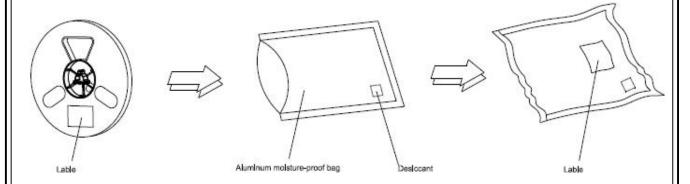

Package: 3000 pcs/reel

## Reel Dimensions

# **Moisture Resistant Packaging**

Note:The tolerances unless mentioned is ±0.1mm,Unit:mm
