It is recommended that a wrist band or an anti-electrostatic glove be used when handling the LEDs.

All devices, equipment and machinery must be properly grounded.

Damaged LEDs will show some unusual characteristics such as the forward voltage becomes lower, or the LEDs do not light at the low current. Criteria : (VF > 2.0V at IF=0.5mA)

(3) Moisture Proof Package

It is recommended that moisture proof package be used .

(4)Cautions:

4.1.Please check if there is air leak before opening the package, if so, please return the goods back to take drying process for later using.

4.2 Products can be used within 15days after packaging, after that, they must be:

- 4.2.1 Soldered within 24 hrs
- 4.2.2 Used in the condition:  $30^{\circ}$ C within and 60%RH below
- 4.2.3 Stored in 30%RH for moisture below.
- 4.3.Products cannot be used for and over 15days after being packaged unless opening the package and take drying our process in 85°C/6H.

4.4.Products not be used for or over 60days after being packaged please return back to take drying out and packaging process for forward using.

4.5.Products not be used after opening the package need to be dried out for  $85^{\circ}C/6H$ 

### PACKAGING

The LEDs are packed in cardboard boxes after taping.
